To get this dramatic look right, the lipstick must be applied as precisely as the eye make-up. Choose rich plum and metallic purple to create a blended smoky eye. Increase colour intensity along the lash line (it helps to apply it wet using a small eyeshadow brush). Choose a berry- or plum-coloured lip and use a lip brush if you have one. **Stick 'em up:** To help lipstick adhere, apply a light layer of concealer to the lips before application.

"Making skin luminous while carefully contouring is important," says make-up artist Rae Morris for L'Oréal Paris. Use a matt bronzer in the hollow of the cheek and a shimmer highlighting liquid high up on the cheekbone. **Bronze baby:** To balance the dark bronze contouring, lightly dust around the temples too.

top tip:

Choose from beige, sand, taupe, bronze and gold, and, if you wish, add a touch of shimmer pink.
