Strip lashes

"It's all about wispy, feathery-looking lashes these days, so steer clear of super-fake bad boys. I struggle when it comes to application, so make sure you measure them along your own lash line – no-one likes a droopy eye look! – and apply glue to the lashes and wait for approximately 30 seconds for it to feel a bit tacky. Using tweezers, press firmly onto your eyelid, concentrating on the corners. Practise makes perfect, but this is my favourite way to change up my look without a trip to the salon."

THE lash FACTOR

Team NW test the lashes that will leave you aflutter

Lash lift

"I like to go eye-make-up-free a lot of the time, so my Luxe Lash Lift treatment paired with a tint was perfect as my lashes are naturally straight and blonde. A technician used a guard to hold back my lashes, before applying a glue and perming solution. It took about an hour, but was worth the wait! The results were subtle, but when your lashes are as dead straight as mine, it's a big difference! I was assured this treatment wouldn't damage my lashes, and bonus, they'd last a good six weeks." **WHERE:** Sharon Lee Inc, Sydney, sharonleeinc.com **PRICE:** \$185
