Be inspired by the star's au naturel bronzed complexion perfection

**T**his *Sin City* star can pull off any look, from bold lips to strong brows and everything in between. But the look we love most on her? Natural make-up, shiny-smooth locks and bronzed skin. No matter what the occasion, Jess nails natural every

time. Copy her look by mixing illuminator with your foundation for luminous skin, then add some bronzer and blush, followed by a rosy pink pout. Brush bronze onto your eyes and define with liner and lots of lashes, then create movement in your hair with a flat iron and voilà!
