**For stowing precious stuff.** Ring box, \$25.95, Thomaspaul, (07) 5500 0678. **UNDER \$50**

# Lash converters

Get lashes worth batting. BY SARA McLEAN

## HOW TO:

### Apply falsies perfectly

Make-up artist Natalia Sprem reveals how to do it like a pro.

**1.** Give the lashes something to stick to by applying a base of foundation and a not-too-creamy concealer on the face and lids. "False lashes will slide off naked eyelids," says Sprem. Try: Clinique Touch Base for Eyes in Canvas (1), \$28, 1800 556 948, [clinique.com.au](http://clinique.com.au).

*TIP: A slick of liner before you put on your falsies will make them undetectable. If you apply afterwards, you risk moving them.*

**2.** To make your false lashes blend with your natural ones, apply liner in three steps. "Start with black pencil, go over with a bit of black shadow, then press and wriggle a flat brush across your lash line, pushing the colour into the base of your lashes." Try: L'Oréal Paris Infallible Eyeliner in Shimmering Black (2), \$22.95, 1300 659 259. Gorgeous Cosmetics Colour Pro Eye Shadow in Jet (3), \$35, 1300 730 277. Laura Mercier Flat Eyeliner Brush (4), \$50, (02) 9663 4277.

**3.** Curl lashes so they curve with your false ones. "Otherwise your real lashes will poke out underneath," says Sprem. Then apply two coats of mascara. Try: Tweezerman Deluxe Eyelash Curler (5), \$24.95, 1800 251 215.

**4.** Trim the strip, clipping from the outer end, inwards, until you get the right length for your lash line. Run the strip through a dollop of glue or use a cotton tip to get a thin, even coating across the whole length. Try: Duo False Lash Adhesive (6), \$15.95, from Kit, 1800 705 800, [kitecosmetics.com.au](http://kitecosmetics.com.au).

*TIP: To make the strip curve naturally to your lash line, bend them gently back and forth between your fingers before applying.*

**5.** Tilt your head back and look down into the mirror. "This gives the clearest view of your lash line, which is where you want to place the strip." Falsies tend to creep off the outer corners first, so apply the strip from that side, inwards.
